# ClaroIdeas™ with Capture

ClaroIdeas is an easy to use, powerful fresh visual software solution for assisting with research, planning, outlining, studying and presenting. ClaroIdeas will help users and groups capture their ideas, pictures, research notes, web page links, audio and video files with more freedom, flexibility and creativity.

Creating 'Idea Maps' using ClaroIdeas enables users to focus thoughts, organise concepts and include text notes, graphical and media content. A user can plan revision, reports, essays and presentation content in a more spontaneous but controlled manner with ClaroIdeas.
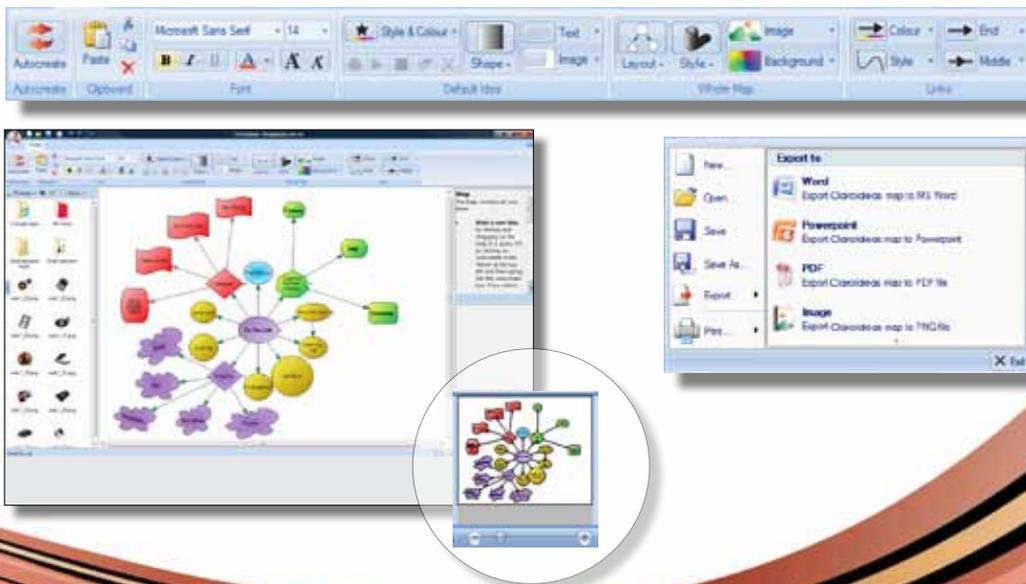

Idea Maps allow a user to focus on bringing together thoughts and related content in various formats, and are a recognised way to maximise learning potential, improve problem-solving, enhance research and aid revision.

ClaroIdeas provides an alternative to linear formatting or structure, aiding memory and revision, and making it easier to create modifications and additions.

With ClaroIdeas, Idea Maps can be converted to linear structured Word documents or PowerPoint presentations, allowing for further composition, presentation and publishing. Idea Maps can be easily organised, re-organised, linked to other maps and content. Maps can also be turned into accessible PDF files or transferred to most smart phones – great for presenting and revision on the move.

Maximise learning potential and improve problem solving.

ClaroIdeas as part of an assistive learning solution

ClaroIdeas as part of an assistive learning solution

ClaroIdeas is part of a study skills solution and can be used with other popular assistive software. Integration with ClaroRead Plus, the popular reading and writing tool, means Idea Maps can be spoken out loud by your computer and checked for spelling errors. This enables dyslexic students to use ClaroIdeas with confidence.

Researched text, scanned papers and image content collected using ClaroCapture can be transferred to an Idea Map with one quick click. This produces a visual representation of the researched content, supporting the research and study process.

Dragon NaturallySpeaking speech recognition and dictation software can be used to dictate text into ClaroIdeas.

## Advantages of ClaroIdeas in learning

By engaging students' interest and encouraging discussions and collaboration, using ClaroIdeas makes learning fun, whether in use at home or in the classroom.

ClaroIdeas is a great addition to the interactive whiteboard toolkit, allowing lesson templates to be developed and delivered, or collaborative working in the classroom and ICT suite. Cost effective school site license options are available.
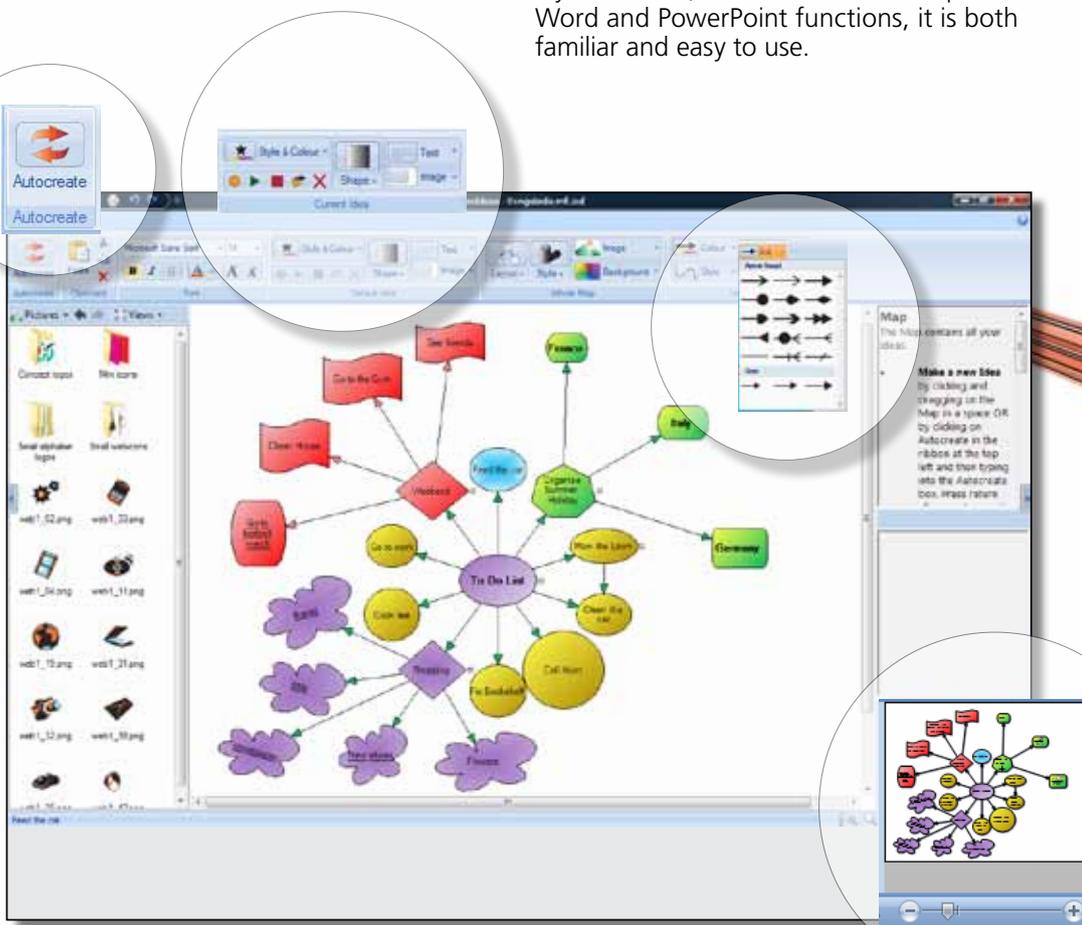

ClaroIdeas can be used by teachers to create lessons, revision guides and essay plans.

For students, the software provides the perfect support tool for revision, researching, planning and producing essays or research papers.

In the workplace, the professional user can envisage, research and produce impressive presentations and content in a fast, efficient easy to use manner. Using the Office 2007 style interface, combined with the export to Word and PowerPoint functions, it is both familiar and easy to use.

## Making learning fun, whether in use at home or in the classroom.

ClaroCapture™

ClaroCapture

ClaroCapture is a research software tool to help users collect together text, images, screenshots, files, recordings and references in a Project file. ClaroCapture is ideal for use when planning essays, reports, brochures, assignments, presentations and other detailed written work.
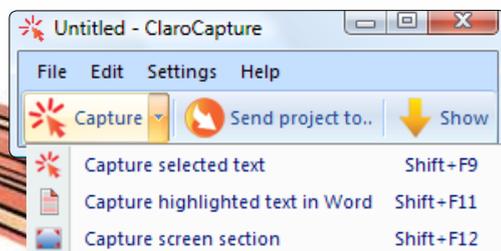

The ClaroCapture Toolbar

With ClaroCapture you can capture information and export to various programs.

You can capture the selected text from any computer application – web pages, PDF files, Word documents, databases – and add it to the current project. If you would like to add an image, audio file or video file, you can drag the image into the Capture project list.
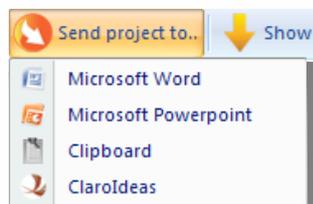

Capture highlighted text in Microsoft Word

You can also extract and capture all of the colour highlighted text in Microsoft Word and add it to the current project. So you can use popular colour highlighting techniques (using Microsoft Word highlighter) to speed up researching and key point identification. You can extract the highlights from the whole Word document, or section by section, depending on your highlighting method.

Capture screen section

With ClaroCapture you can select an area of the screen and ClaroCapture will add this area as an image to the current project. Great for adding the combination of pictures, graphs and associated text and references.

Once you have collected together all your information you can export it into various formats using the "Send Project To.." button on the ClaroCapture toolbar.

Microsoft Word

Clicking on this button will send the contents of the current project to Microsoft Word.

Microsoft PowerPoint

Clicking on this button will send the contents of the current project to Microsoft PowerPoint.

Clipboard

Clicking on this button will copy the contents of the current project to the computer's clipboard.

ClaroIdeas

Clicking on this button will send the contents of the current project to ClaroIdeas. This option will only be available if ClaroIdeas is installed.

Capture information and export to Word, PowerPoint, ClaroIdeas and more.
