

Lightning Magnifier

Lightning is a new magnification software program for the modern fast PC. It makes items on the computer screen bigger, by magnifying beneath the mouse. Whatever appears on the computer screen can be magnified up to 16 times. Lightning works well with all Windows applications. You can even magnify video clips.

Lightning is excellent value for money, providing a great feature range and good reliability.

There is also a special version of Lightning that can run directly from a USB Memory stick - so plug it into any computer and Lightning will run automatically. This gives complete portability for the user.

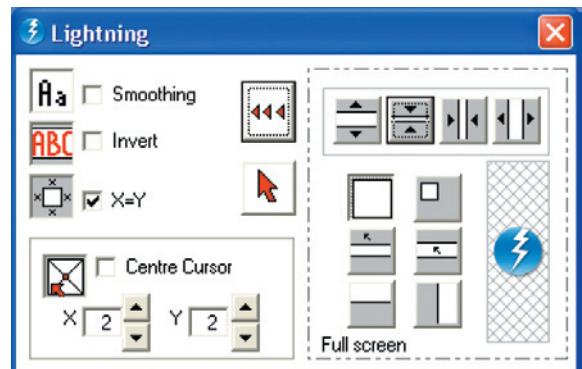

Key features:

Magnify the screen up to 16 times.
Change the shape or size of letters and pictures.
Invert on screen colours for better contrast.
Font smoother.

Special Features Tool with options for:

- Full Screen Magnification
- Magnifying Lens
- Strip Magnifier
- Vertical and Horizontal Split Screens

Lightning Settings

Lightning is simple to use and has a wide range of settings. The standard Settings Screen displays the smoothing, invert, magnification size and cursor colour settings.

The expanded settings screen displays the options for viewing full screen, by lens, split screen, horizontal or vertical ruler. The size of the ruler or split screen can be easily modified using the size adjust buttons.
